Projects

Project 1 Title: Employee Management System

Environments: Java 8, Spring Boot, ReactJS, MySQL.

Duration: 06-09-2023 to 06-12-2023.

Project Link: https://github.com/sksvamsi/employee-management-system

Employees are the backbone of any company therefore their contribution plays a major role in deciding the success of an organization. Employees Management Software makes it easy for the employer to keep track of all records. This software allows the administrator to edit employees, add new employees, transfer/promote/terminate employees. You can check to see if there are duplicate positions/employees in the database. A flexible and easy to use Employee Management software solution for small and medium sized companies. The goal of this project is to design and develop an employee management system to fill existing gaps in the electronic management of employees.

Project 2 Title: Food Munch

Environments: Html Css Bootstrap.

Duration: 06-07-2023 to 06-8-2023.

Project Link: https://sksvamsi.github.io/foodmunch/

Developed a responsive website for a Food Store where users can see a list of food items, detailed information about a food item offers .Designed page using the following HTML structure elements like li, header, article, footer elements, and different bootstrap components to show different sections in the website and different bootstrap classes for responsiveness through a mobile-first approach.
